

Who is this living being? Who does he belong to?

How is this living being related to others?

1. Was not this living being the offspring of many others in his previous lives? Was he not the sibling of many? How many people did he fascinate? Did he not cause sorrow to many others?

2. How many places did a living being move during his previous births? What is this relationship? How long the relationship exists? Who knows when and where this life goes?

3. Soul is never ruined. Does not this life move to different bodies? Does he not occupy a number of leadership positions? Is it not just the delusion caused by lord Venkatesa?
